

BEST PRACTICES GUIDE

HOW IT WORKS

NueNutri™ is an optimized liquid biostimulant containing vinasses, amino acids and essential micronutrients, to enhance crops flowering periods and improve yield. NueNutri contains bioactive compounds that activate specific metabolic pathways, especially important at the pre-flowering stage, to enhance yield by reducing flower abortion and mitigating abiotic stress.

APPLICATION (32 OZ / ACRE)

Foliar

Tank Mixing

Step 1

Load water into the application tank

Step 2

Foliar - Load adjuvants, compatible herbicides, fungicides & compatible insecticides

Step 3

Load 32 oz/acre of NueNutri into mixture

COMPATIBILITY

- ✓ 10-34-0
- ✓ 6-24-6
- ✓ Most Other Starters
- ✓ Liquid Micronutrients
- ✓ Fungicides
- ✓ Bifenthrin
(Capture LFR/Generic Capture)
- ✓ Some Insecticides
- ✓ Glyphosate
- ✓ Glufosinate
- ✓ 2,4-D
- ✓ Most Other Herbicides
- ✓ UAN Broadcast
- ✓ UAN Sidedress

STORAGE

- Shelf Life: 3 years when properly stored
- Storage Temp: Above 34°
- Keep out of sun
- Do not freeze
- Keep out of reach of children and animals
- Store in original container
- Keep container sealed tightly when not in use

TIMING

CORN

Apply from tasseling to grain fill

SOYBEANS

Apply from flowering to pod fill

WHEAT

Apply from flag leaf to tillering

ALFALFA

Apply 5-7 days after each cutting

RECOMMENDATIONS

- Use with current nitrogen program
- Use a surfactant for best results
- Do not exceed water pressure of 45 PSI
- Use 100 mesh screen & flat fan nozzles
