

2020

2 YEAR BIOLOGICAL FIELD TRIAL RESULTS

 10 STATES |  CORN |  82 DATA POINTS |  IN FURROW & FOLIAR

envita

79%

POSITIVE RESPONSE

8.0

Bu/Acre

ADVANTAGE

When Positive Response Achieved

“The benefits of using Envita outweighs the risk of NOT using it. I’ve tested it two years in a row, and corn treated with it consistently yields more, has better test weight and is a good 1/2 point drier. It will go on every acre I have from now on.”

- Jeremy Gappert - New Salem, ND

Notes:

Results valid as of 11/13/20. Data is subject to change with the receipt of additional trial information. Average results are given to communicate observations, though individual results may vary.
