Bu/Acre

## ADVANTAGE

When Positive Response Achieved

“Our experience with IonFX this year was not only very successful for increasing yields, but the ROI pencils out great. We made money in it! Our small grains with Ionfx in both seed coating and foliar were so successful it is now part of our standard seed treatment program on all our small grains and corns. Best of all my clients are very excited to include IonFX on their seed next season.”

- Jeff Pemberton, General Manager Revolution Soil and Science

### Notes:

Results valid as of 11/13/20. Data is subject to change with the receipt of additional trial information. Average results are given to communicate observations, though individual results may vary.
