Bu/Acre
ADVANTAGE

Envita is a nitrogen fixing solution that changes the nitrogen on your farm. Envita can be used for in-furrow or foliar application. Envita colonizes and lives in the plant (both in above and below ground tissue) to enable nitrogen fixation throughout the plant. Soyfx™ is a specific/unique combination of identified and tested microbials that elicit a positive crop response. Soyfx™ unlocks the plant's ability to produce growth regulators and metabolites that enhance production through biosynthetic pathway efficiencies.

For additional plot details, contact your local YMS representative or email info@yieldmastersolutions.com.
